

4th ASECAP SUSTAINABILITY FORUM

15 December 2025
Rome, Italy

Hosted by

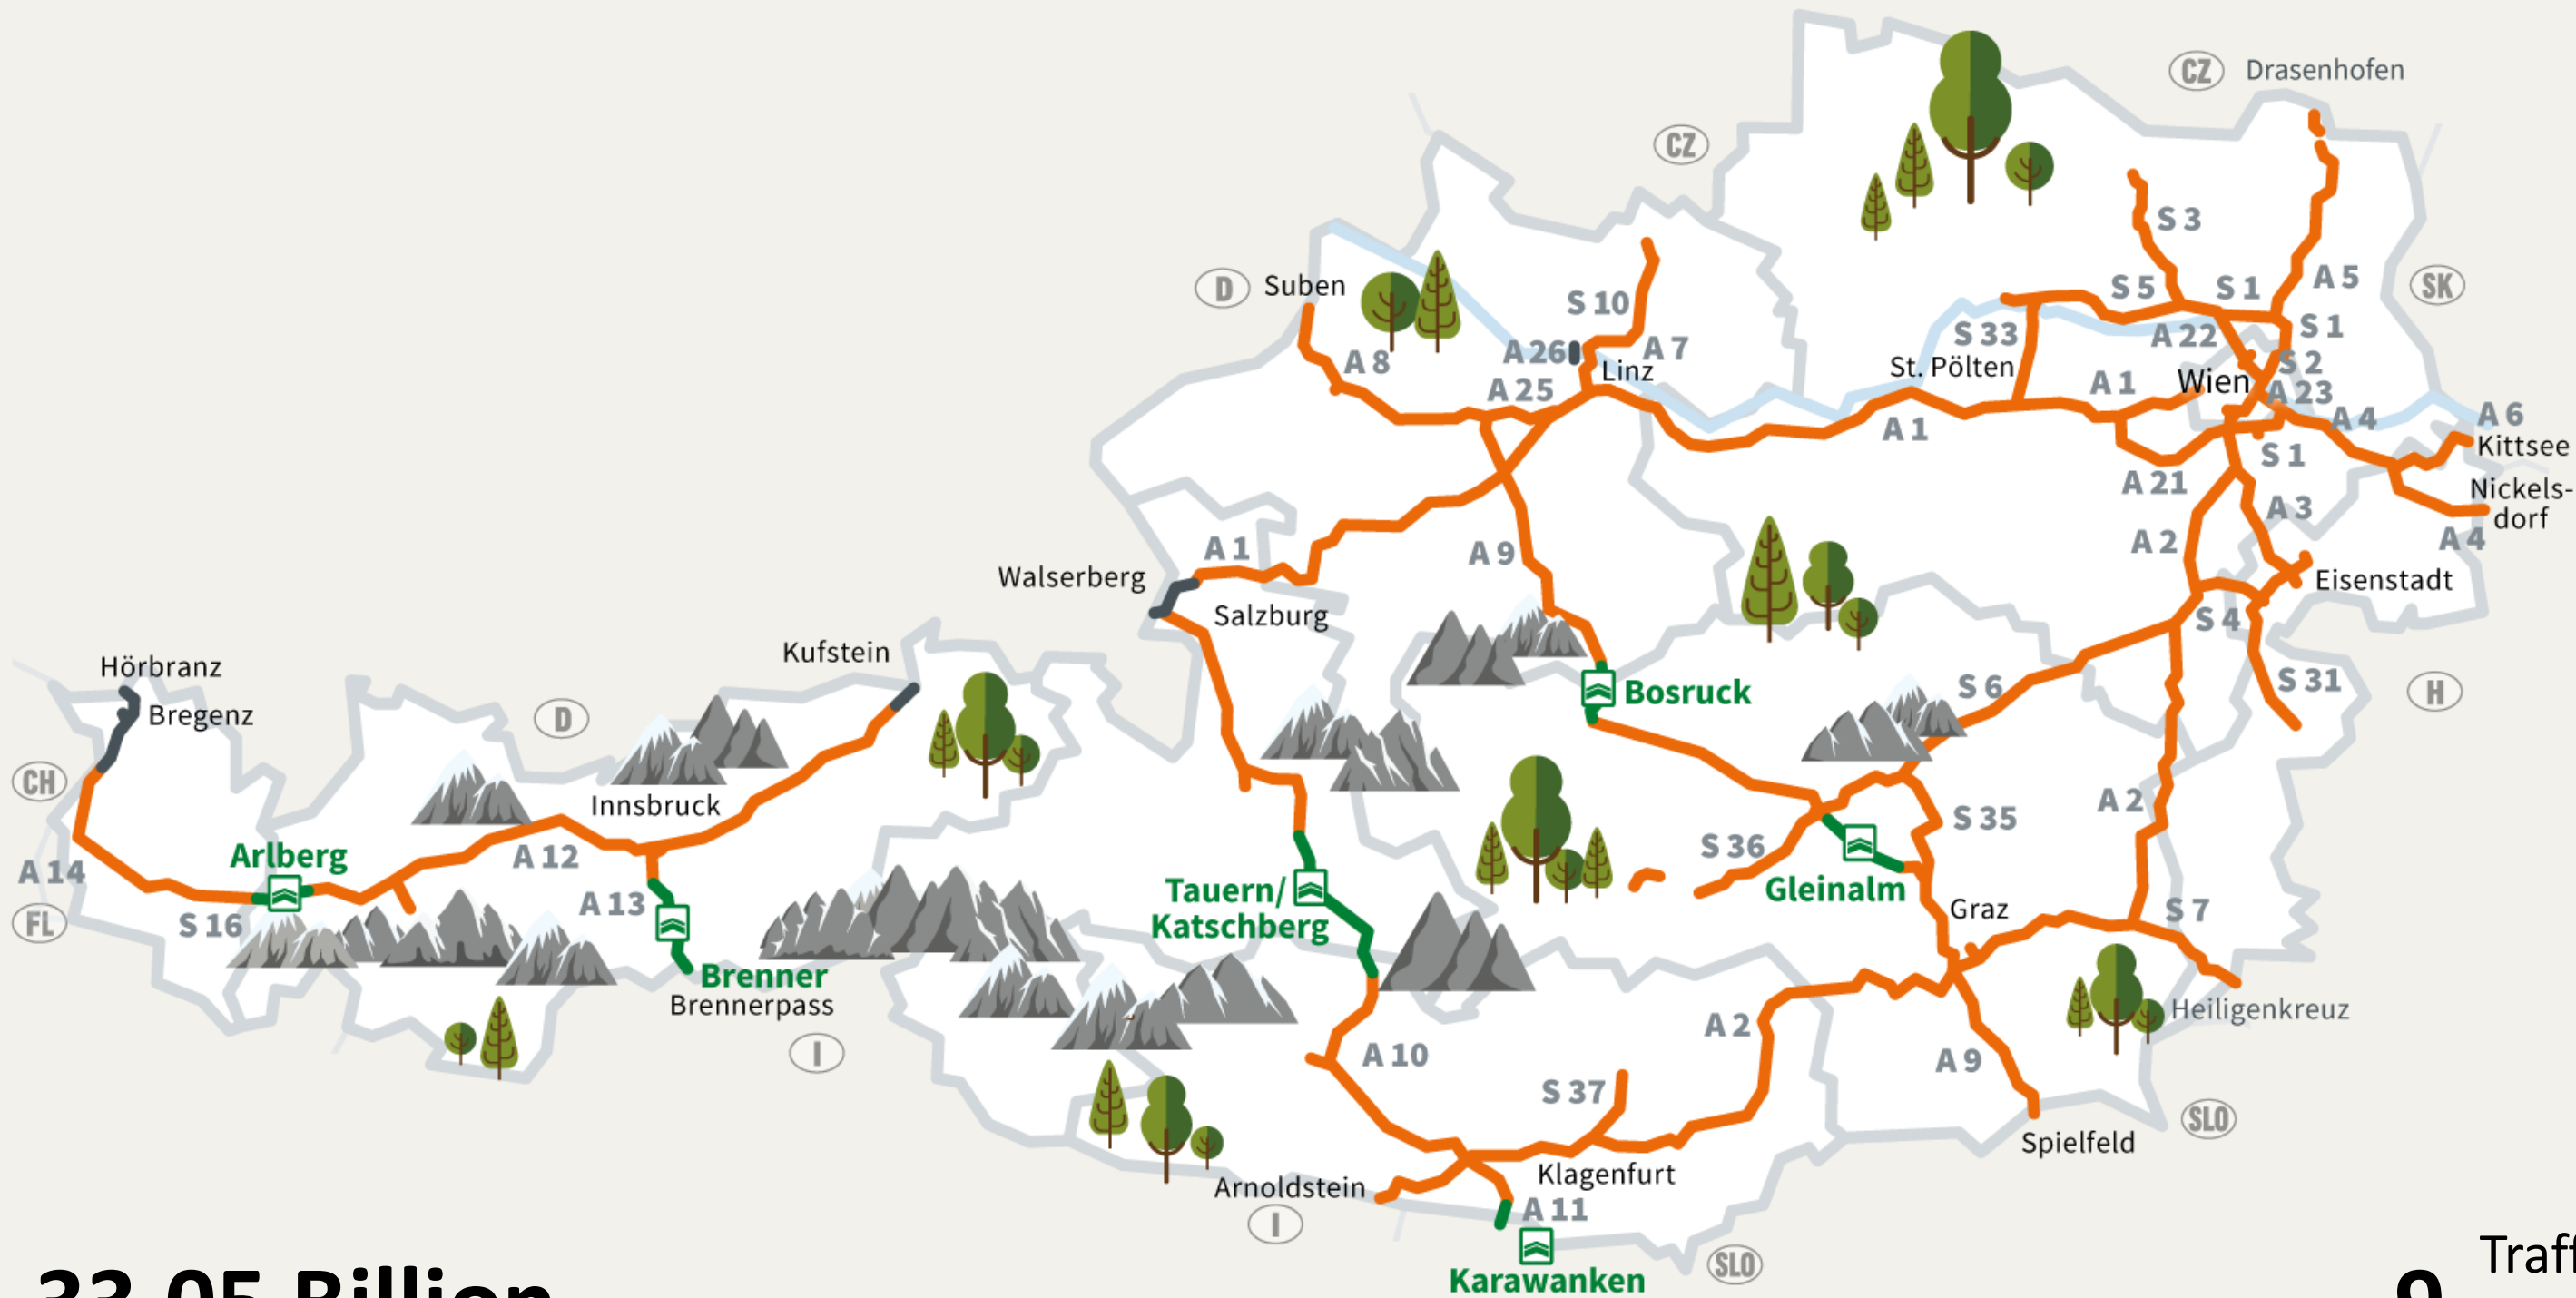

Organized by

From sustainability strategy to reporting: the path to achieving goals

Simone Berg
ASFINAG | Head of Corporate Strategy

~3,500
Employees

6 Toll stations

9 Traffic management centres

33.05 Billion

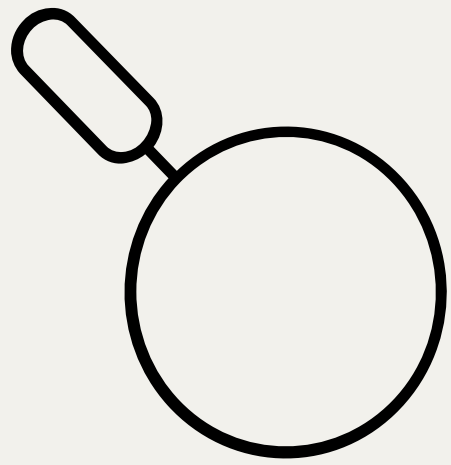

km of total traffic per year

2,278

kilometres of road network

43

Motorway operation and maintenance facilities

5.000 ha
Wooded areas

21.000
Individual trees

60
Wildlife crossings

>2.700 km
Wildlife protection
fences

>1.400 km
Noise barriers

>2.000
Water protection
facilities

>4.000 ha
Other green spaces

From Strategy to Reporting (to Strategy)

- **Since 2006**
Sustainability Reporting, since 2016 according to GRI standards
- **2023**
Double materiality analysis
- **2024**
First Sustainability Report according to ESRS-standards
- **2025**
Internal processes, reporting and risk management, internal control systems
- **2027 (?)**
Path to net Zero

FIELDS OF ACTION & FOCUS AREAS

Climate Change	Resource Use & Circular Economy	Biodiversity & Ecosystems	Environmental protection
Decarbonisation of the motorway and expressway network	Sustainability in Construction (Resources)	Contributions to habitat networking	Reduction of noise pollution
Climate change adaptation	Sustainability criteria in procurement, construction & operations	Green space strategy for forests and meadows	Reducing air pollution from traffic
Energy Strategy	Waste reduction		Prevention of water and soil pollution
	Conservation of (drinking) water resources on the motorway and expressway network		

From Strategy to Reporting (to Strategy)

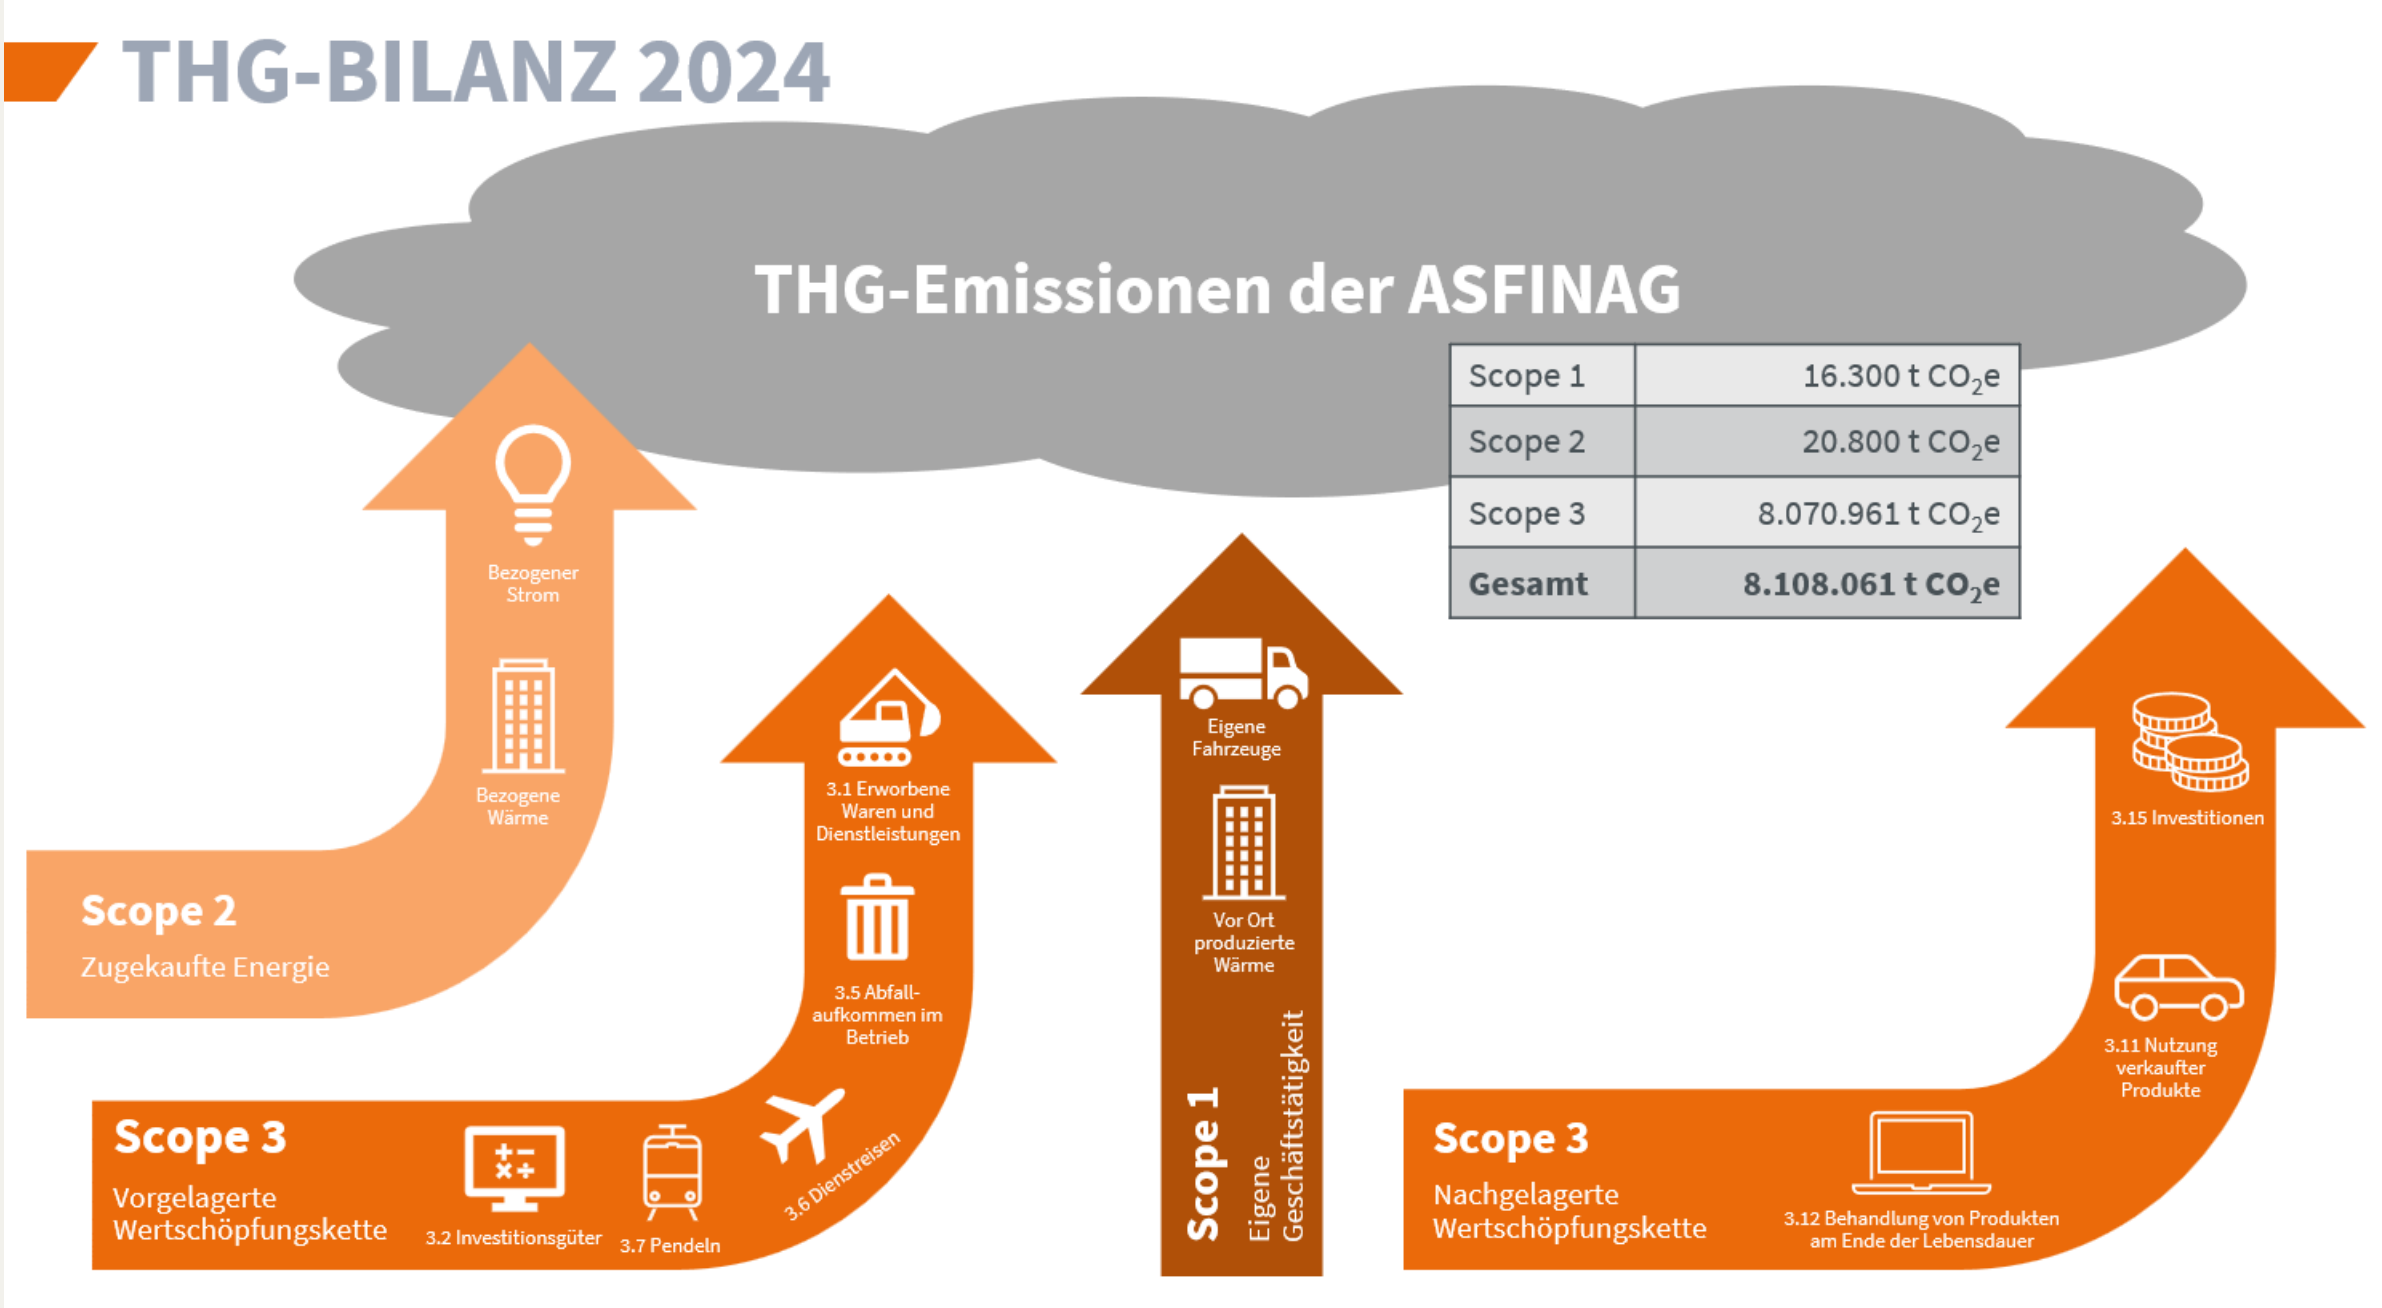

- **Since 2006**
Sustainability Reporting,
since 2016 according to
GRI standards
- **2023**
Double materiality analysis
- **2024**
First Sustainability Report
according to ESRS-standards
- **2025**
Internal processes, reporting
and risk management, internal
control systems
- **2027 (?)**
Path to net Zero

- ▶ **59 IROs**
In E, S and G
- ▶ **Main Challenges in E**
Resources, Input
and Output,
greenhouse gas
accounting
- ▶ **Close
Cooperation**
With national
environmental
agency

From Strategy to Reporting (to Strategy)

- **Since 2006**
Sustainability Reporting, since 2016 according to GRI standards
- **2023**
Double materiality analysis
- **2024**
First Sustainability Report according to ESRS-standards
- **2025**
Internal processes, reporting and risk management, internal control systems
- **2027 (?)**
Path to net Zero

From Strategy to Reporting (to Strategy)

2026+

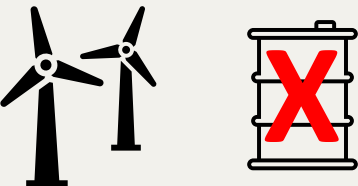

Decarbonization

Reaching net zero by 2050

Energy strategy

Energy self-sufficient until 2030

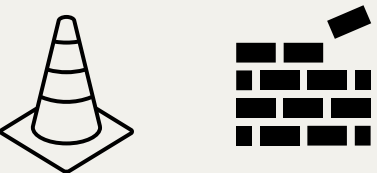

Climate Change Adaption

Reaching net zero by 2050

CO₂- Assessment of construction sites

Reaching net zero by 2050

To Conclude

ESRS-Reporting

- Changed how we **organize** our sustainability strategy
- Keeps companies on track – **transparent** and **traceable**
- **Easier access** to information, **comparisons** between companies

2026+

- ASFINAG will **implement simplifications** and streamline report
- „Climate- and Environmental Protection Programme 2030+“ will be published
- Renew materiality analysis
- **Path to net zero**

THANK YOU
