

8th annual ASECAP Road Safety Conference

Road safety and mobility for the future

Hotel Steigenberger, Vienna Herrengasse, Tuesday 3 March 2015

INTRODUCTION

The 8th annual ASECAP Road Safety Conference will take place in Vienna on the 3rd of March 2015. ASECAP and its members consider Road Safety as the key mission guiding their work and activities in order to keep ensuring that toll roads are the safest roads in Europe.

In the area of road safety, the key challenges of the future and the potential solutions stems from the development of a safe cooperative system between the infrastructure, the vehicles and the driver, the so called Safety Triangle.

This Conference will be the opportunity to actively discuss the priorities of the newly appointed European Commission and the European Parliament and the possible revision of the European road safety legislative framework. ASECAP and its members are willing to share their views and strong expertise on what needs to be done to achieve the “vision zero” goal of no fatalities on the European roads.

ASECAP and its members will provide some interesting presentations shedding more light on the many projects and innovations they are currently implementing to ensure a very safe and efficient mobility across Europe.
